

From

1 July 2026

Companies and individuals importing regulated electrical products must comply with the National Environment Agency (NEA) new expanded regulations. Now also applies to goods imported directly by end users (either by companies or individuals) for own use.

Mandatory Energy Labelling Scheme (MELS)

Minimum Energy Performance Standards (MEPS)

**Make Energy
Efficiency *Your*
Competitive
Advantage**

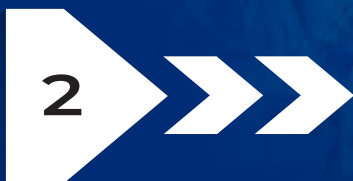

SWIPE >>>

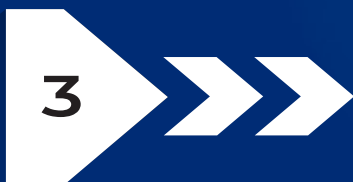

To import *regulated* products into Singapore, individuals and companies must now ensure that the products imported for own use:

✓ Meet the applicable MEPS requirements

✓ Are registered with NEA before importation

✓ Carry the required Energy Label under MELS, where applicable

New Requirements Apply To:

- Air-conditioners (including portable and VRF systems)
- Refrigerators and commercial storage refrigerators
- Three-phase induction motors
- Clothes dryers
- Televisions
- Household water heaters
- Lamps

SWIPE >>>

New *Advertising* Requirements

The NEA circular also introduces new requirements, under Part 2A of the Energy Conservation (Regulated Goods and Registered Suppliers) regulations for the advertising of these goods.

1

✓ Only products that comply with applicable regulatory requirements are advertised

2

✓ Visual advertisements must display a legible Energy Label

3

✓ Where displaying the Energy Label is impractical, the product's tick rating and Certificate of Registration (COR) number must be prominently stated

Electronic Marketplace

✓ Operators are required to prevent the publication of non-compliant advertisements of regulated products
