SETSCO

Building Trust in Connected IoT Products Starts with **Security**

SWIPE >>>

SETSCO

From smart home appliances and consumer electronics to industrial control systems, medical devices and critical infrastructure, connected technologies are creating unprecedented opportunities.

However, they also introduce new cybersecurity risks that organisations must proactively address.

SWIPE >>>

SETSCO

At SETSCO AN Security Pte Ltd, we support businesses with:

✅ Independent cybersecurity evaluation & testing

✅ Security validation for IoT, wireless and connected devices

✅ Alignment with international standards (e.g. ISO 27001, Common Criteria)

✅ Risk identification across hardware, firmware and software layers

✅ Trusted, impartial certification to strengthen market credibility
